

SET 3

*All the program must be done by using function •

Q 1) Reverse a string by using pointer.

Q 2) Check a string is palindrome or not by using pointer & without using pointer. (Ex: - MADDAM)

Q 3) Extract a string from the given string. By using pointer & without using pointer.

(Ex: - "ABCDEFGH ", i = 2 & j = 5 output: - "CDEF ").

Q 4) Compare two string. Using pointer & without pointer.

(Ex: 1st str : abc, 2nd str : bcd .Output : - if 1st str > 2nd str o/p 1;
if 1st str == 2nd str o/p = 0 & if 1st str < 2nd str o/p = -1)

Q 5) Check two string is Anagram or not.

(Ex. str1: "ABCD" , str2: "CBDA "they are anagram)

Q 6) Find prime factor of given No.

(Ex: - 48 o/p: 2, 3, i/p: - 50 o/p: - 2, 5)

Q 7) Remove duplicate element from a given array.

(Ex :- i/p :- 2,3,4,2,4,3,2,5 o/p :- 2,3,4,5)

Q 8) Reverse sentence word by word without using extra array. (Ex: i/p - "Ram eats mango "o/p: -"mango eats Ram").

Q 9) Count Maximum occurrence of character in the given string. (Ex:- i/p : " ababcabac , o/p :- a : 4)

Q 10) Write Pig latin program (i/p :- " adbc defg kmlno "
o/p :- " dbcaer efgder mlnoker ").
